I would definitely be interested in attending and can be available on both dates suggested.

Thanks...Pat

Guy and Arseny,

So far, March 27 or 29 are still available on my calendar for both the modeling discussion and PFAS discussion. On the latter, our Director of Water Quality, Pat Versluis, may wish to attend, so I am copying him on this email to see if he's available those dates. Roy

Roy, Arseny:

If your schedules allow in late March, the Navy would like to couple another meeting with OCWD and IRWD on the same day as the IRP Site 18 modeling meeting to discuss PFAS detections at and in the vicinity of Former MCAS El Toro in various groundwater samples the Navy collected last summer. In Marc Smits' notification letter to your organizations' heads (attached), we proposed such a meeting and are now following up. Since we do not need the participation of our respective modeling consultants, we could either hold the meeting before or after the modeling discussion. If we can agree on a mutual date/time, I will be informing and inviting the regulatory agencies to participate (either in person or via phone). The Navy could work with OCWD and IRWD to develop an agenda ahead of the meeting. Thanks.

I am available the last week of March. I agree that it would be helpful to have 1-2 weeks to review any of the new model results prior to the meeting.

Arseny, thanks. I agree completely and it is our intention to provide materials well ahead of the meeting to allow for enough time for your staff and consultants to review. I will be in touch in the coming weeks to coordinate. I have copied Roy and Tim from OCWD to make them aware of our plans. Hopefully they are generally available in late March.

Guy,

I see no problem in scheduling the modeling project meeting in late March, however, it is too early to guarantee availability of IRWD and TT staff on exact dates you have proposed (3/27 or 3/29). We can set a placeholder date now and fine tune it later in early March.

I think that the prerequisite for a successful meeting would be availability of the new model corrections/tweaks at least a week, preferably two weeks ahead of the meeting, so TT and OCWD would be able to provide their input. Do you agree? Please let me know if this is feasible.

Thanks,

Arseny Kalinsky, P.E.

Arseny, I met with AECOM this morning and discussed the status of the project. We would like to propose regrouping at the end of March. Are you and your team available on either the 27th or 29th? If so, I will inquire with OCWD and organize the meeting. Perhaps it is best accomplished again at your facility in Irvine. Thanks.

Hi Arseny, happy new year to you too. I am actually sitting down with AECOM tomorrow morning to go over their progress on the modeling and regrouping with the extended team. I will be able to update you after that meeting. Thanks.

Hi Guy,

Happy New Year! Hope you are doing well and had a great holiday.

It was a while since we heard from you (or AECOM) on the modeling project. TT just asked me if there is a new update on the project. So, when you have a chance, can you please update me on any developments and the time line for any new submissions from AECOM.

Thanks and best regards,
